PART 1 - FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

The accompanying balance sheet of Standard Capital Corporation (an exploration stage company) at February 28, 2003 (with comparative figures as at August 31, 2002) and the statement of operations and statement of cash flow for the three and six months ended February 28, 2003 and 2002 and for the period from September 24, 1998 (date of incorporation) to February 28, 2003 have been prepared by the Company's management in conformity with accounting principles generally accepted in the United States of America. In the opinion of management, all adjustments considered necessary for a fair presentation of the results of operations and financial position have been included and all such adjustments are of a normal recurring nature.

Operating results for the quarter ended February 28, 2003, are not necessarily indicative of the results that can be expected for the year ending August 31, 2003.

(An Exploration Stage Company)

NOTES TO FINANCIAL STATEMENTS

February 28, 2003

(Unaudited - Prepared by Management)

1. ORGANIZATION

The Company was incorporated under the laws of the State of Delaware on September 24, 1998 with the authorized common stock of 25,000,000 shares at \$0.001 par value.

The Company was organized for the purpose of acquiring and developing mineral properties. At the report date mineral claims, with unknown reserves, had been acquired. The Company has not established the existence of a commercially minable ore deposit and therefore has not reached the development stage and is considered to be in the exploration stage (see note 3).

The Company has completed one Regulation D offering of 1,295,000 shares of its capital stock for cash.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting Methods

The Company recognizes income and expenses based on the accrual method of accounting.

Dividend Policy

The Company has not yet adopted a policy regarding payment of dividends.

Income Taxes

On February 28, 2003, the Company had a net operating loss carry forward of \$59,358. The tax benefit of \$17,807 from the loss carry forward has been fully offset by a valuation reserve because the use of the future tax benefit is doubtful since the Company has no operations.

The loss carry forward will expire in 2024.

Basic and Diluted Net Income (loss) Per Share

Basic net income (loss) per share amounts are computed based on the weighted average number of shares actually outstanding. Diluted net income (loss) per share amounts are computed using the weighted average number of common and common equivalent shares outstanding as if shares had been issued on the exercise of the preferred share rights unless the exercise becomes antidilutive and then only the basic per share amounts are shown in the report.

-7-

STANDARD CAPITAL CORPORATION
(An Exploration Stage Company)

NOTES TO FINANCIAL STATEMENTS

February 28, 2003

(Unaudited - Prepared by Management)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - CONTINUED

Environmental Requirements

At the report date environmental requirements related to the mineral claim acquired (Note 3) are unknown and therefore any estimate of any future cost cannot be made.

Mineral Claim Costs

Cost of acquisition, exploration, carrying and retaining unproven properties are expensed as incurred.

Financial and Concentration Risk

The Company does not have any concentration or related financial credit

risk.

Revenue Recognition

Revenue is recognized on the sale and delivery of product or the completion of services provided.

Statement of Cash Flows

For the purposes of the statement of cash flows, the Company considers all highly liquid investments with a maturity of three months or less to be cash equivalents.

Financial Instruments

The carrying amounts of financial instruments, including cash and accounts payable, are considered by management to be their estimated fair value.

Estimates and Assumptions

Management uses estimates and assumptions in preparing financial statements in accordance with accounting principles generally accepted in the United States of America. Those estimates and assumptions affect the reported amounts of the assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could vary from the estimates that were assumed in preparing these financial statements.

-8-

STANDARD CAPITAL CORPORATION
(An Exploration Stage Company)

NOTES TO FINANCIAL STATEMENTS

February 28, 2003

(Unaudited - Prepared by Management)

3. AQUISITION OF MINERAL CLAIM

The Company acquired one 18 unit metric claim known as the Standard claim situated within the Bridge River gold camp near the town of Gold Bridge, 160 kilometres north of Vancouver, British Columbia, with an expiration date of February 24, 2003. The renewal cost of these claims was \$3,600 Canadian. The costs of staking and filing have been expensed.

4. SIGNIFICANT TRANSACTIONS WITH RELATED PARTY

Officers-directors, and their controlled entities, have acquired 7.8% of the outstanding common stock and have made no interest, demand loans of \$16,303 to the Company, and have made contributions to capital of \$18,900 by the payment of Company expenses.

5. GOING CONCERN

The Company will need additional working capital to service its debt and for its planned activity, which raises substantial doubt about its ability to continue as a going concern. Continuation of the Company as a going concern is dependent on obtaining additional working capital and the management of the Company has developed a strategy, which it believes will accomplish this objective through additional equity funding, and long term financing, and payment of Company expenses by its officer, which will enable the Company to operate for the coming year.

-9-

PLAN OF OPERATIONS

The following discussion should be read in conjunction with the information contained in the financial statements of Standard Capital Corporation ("Standard") and the notes which form an integral part of the financial statements which are attached hereto.

The financial statements mentioned above have been prepared in conformity with accounting principles generally accepted in the United States of America and are stated in United States dollars.

Standard presently has minimal day-to-day operations and to maintain the Standard claim in good standing on an annual basis and prepare the filings of reports to the United States Securities and Exchange Commission (the "SEC") as required. Due to a lack of working capital, Standard is deficient in its filing of reports to the SEC. Management is currently attempting to rectify this situation.

LIQUIDITY AND CAPITAL RESOURCES

Standard has had no revenue since inception and its accumulated deficit is \$59,358. To date, the growth of Standard has been funded by the sale of shares and advances by the directors and officers in order to meet the requirements of filing with the SEC and maintaining the Standard claim in good standing.

The plan of operations during the next twelve months will be to maintain the Standard claim in good standing with the Province of British Columbia and meet its filing requirements. Presently Standard does not have the funds to consider any additional mineral claims. Management is considering the raising of additional funds through the sale of shares but no decision as to the price and number of shares to be issued has been decided upon.

Management estimates that a minimum of \$13,500 will be required over the next twelve months to pay for such expenses as bookkeeping, auditing, filing fees, exploration activities on the Standard claim and payments to the transfer agent. The above noted figure does not include amounts owed to creditors in the amount of \$21,399 as at February 28, 2003. If all debts, other than amounts owed to related parties, are settled during the next twelve months Standard will need approximately \$35,000. At present Standard does not have these funds and would be required to either sell shares in its capital stock or obtain further advances from its director and President. Standard's future operations and growth is dependent on its ability to raise capital for expansion and to seek revenue sources.

RESULTS OF OPERATIONS

On February 21, 2003, a Mine Technologist completed a report regarding work done on the Standard claim in February 2003.

The Standard claim was staked to encompass prospective ground in the Fergusson Creek drainage basin. The Fergusson Creek bisects the claim block in the northeast corner of the claim. The objective of this physical work program is to lay out a sampling grid system in preparation for a geochemical soils sampling program. A total budget of \$2,133 was expended to lay out approximately 9,700 feet of sampling grid.

The Standard claim was located and staked on January 24, 1999 by the four post staking method and is presently in good standing. This mineral claim consists of 18 units totaling 450 hectares with an area 2 miles south by 1 mile west.

The Legal Corner Post is located approximately 2 miles southeast of the Village of Bralorne and on the north side of Fergusson Creek. Access to the Standard claim is by snowmobile part way up the Fergusson Creek access trail to the 5,800 feet elevation and approximately 1 mile up Fergusson Creek.

The claim boundary is characterized by extreme topographical conditions. Sub-alpine scrub alder and hemlock trees grow at the creek elevations and rock outcropping exposure is good along peaks and ridges in the east half of the canyon. The winters are cold with generally high snowfall accumulations and summers are hot and dry.

The exploration work on the Standard claim undertaken in February 2003 resulted in 5 days being spent by the technician performing the work and 4 days by an assistant. A grid system was laid out for the soils geochemical program and a follow-up geophysical survey.

The grid was as follows:

Baseline:	Compete	
Grid sample line:	Stations flagged every 30 feet	
	Station 0 + 100S to 0 + 860W	2,580 feet
	Station 0 + 400S to 0 + 420W	1,260 feet
	Station 0 + 600S to 0 + 330W	990 feet
	Station 0 + 700S to 0 + 290E	780 feet
	Station 0 + 800S to 0 + 450E	1,350 feet

It is recommended from the above mentioned grid that an initial soil geochemistry program be undertaken over the entire grid and prospect the ridge for geological structures. Standard will have to raise funds to undertake this exploration program.

Standard has undertaken no product research and development since inception. Management has no plans to purchase or sell any plant or significant equipment in the foreseeable future. In addition, Standard does not expect a significant change in the number of employees.

There are certain risk factors regarding Standard's operation which might effect the outcome of its ability to operate in the future are listed below.

1. Standard's auditors indicated there may be a going concern problem and Standard may not be able to achieve its objectives.

The auditors have issued a going concern opinion in their opinion attached to the audited financial statements for the year ended August 31, 2002. This means there is substantial doubt on the part of the auditors where Standard can continue its operations for the next twelve months based on its financial status as at the year-end. If the two officers and directors are unwilling to continue to advance Standard money, Standard will need to raise money necessary for the exploration of the Standard claim, or else it might have to cease operations. Without the ability to explore the Standard claim, Standard will not be able to achieve its objectives set by management.

-11-

2. Penny stock rules may make buying or selling of Standard's shares difficult.

Trading in Standard's shares will, when a quotation is obtained on the OTC Bulletin Board, be subject to the "Penny Stock" rules. The SEC has adopted regulations that generally define a penny stock to be any equity security that has a market price of less than \$5.00 per share, subject to certain exceptions. These rules require that any broker-dealer who recommends Standard's shares to persons other than prior investors and accredited investors, must prior to the sale, make a special written suitability determination for the purchaser and receive the purchaser's written agreement to execute the transaction. Unless an exception is available, the regulations require the delivery, prior to any transaction involving a penny stock, of a disclosure explaining the penny stock market and the risks associated with trading in the penny stock market. In addition, broker-dealers must disclose commissions payable to both the broker-dealer and the registered representative and current quotations for the securities they offer. The additional burdens imposed upon broker-dealers by such requirements may discourage broker-dealers from effecting transactions in Standard's shares, which could severely limit their market price and liquidity of Standard's shares. Broker-dealers who sell penny stocks to certain types of investors are required to comply with the SEC's regulations concerning the transfer of penny stock. These regulations require broker-dealers to:

- - Make a suitability determination prior to selling a penny stock to the purchaser;
- - Receive the purchaser's written consent to the transaction; and
- - Provide certain written disclosures to the purchaser.

Any future investor must consider that Standard's share price might never be considered anything more than "penny stock".

3. Standard lacks an operating history and has losses which are expected to continue into the future. If the losses continue Standard will have to suspend operations or cease operations.

Standard was incorporated on September 24, 1998 and has not realized any revenue to date. It has no operating history upon which an evaluation of its future success or failure can be made. The net loss since inception is \$59,358. Standard's ability to achieve profitability at the present time is doubtful based on past experiences. It might never realize a positive cash flow from its exploration activities on the Standard claim and therefore may continue to incur negative cash flows for years into the future.

4. Lack of employees due to no funds to hire new employees

Standard currently only has two employees, its President, Del Thachuk and Secretary Treasurer, Mary Anne Thachuk. Neither of these two individuals work full time for Standard since they have other job commitments. There is a substantial risk Standard will not have the funds necessary to hire additional employees that would be needed in Standard's exploration program.

5. Lack of geological experience by the officers and directors

Even though Del Thachuk was involved in placer mining for over 30 years and was President of Red Fox Minerals Ltd until 10 year ago but he does not have a geological background. Mary Anne Thachuk has no experience in the mineral industry. Therefore, Standard will have to rely upon outside consultants to give advise on the various methods of exploring the Standard claim.

6. Conflict of Interest

Del Thachuk is an officer and director of Info-Pro Marketing Inc. ("Info-Pro"), a private Nevada company and, therefore, there might be a conflict of interest

-12-

in his dealing between Standard and Info-Pro. Since Info-Pro is not in the mineral exploration industry, the real conflict will be how he devotes his time between the two companies. Standard can only hope that he deals fairly with it.

7. Money is difficult to obtain for "grass roots" exploration.

The future exploration of the Standard claim is considered "grass roots" in that it is speculative in nature due to being a search for an ore reserve. Investors tend to be shy about investing in "grass roots" exploration programs since if no mineralization is discovered on the Standard claim, Standard might allow the claim to lapse. If management is unable to identify another mineral claim, the money invested by shareholders might be lost and never recovered.

8. Fluctuating prices of minerals could cease exploration activities on the Standard claim.

Standard has absolutely no control over the daily prices of various minerals. These daily mineral prices are set by the world markets. When gold and silver prices, per ounce, have fallen in value, Standard will find it difficult to attract money for exploration on the Standard claim. Later, if it ever happens, and Standard finds an ore reserve it might not be able to develop such a reserve on the Standard claim due to fallen mineral prices.

9. Other fluctuating prices outside of the control of Standard.

Standard will not have any control over fluctuating prices of labor, supplies, equipment and taxes. Any sudden increase in any of these costs will have the effect of limiting the amount of exploration activities Standard can undertake on its mineral claim. For example, if Standard budgeted a certain number of dollars for workers during the exploration on the Standard claim and their daily rate doubled, the number of days used for exploration would be reduced accordingly. This will limit the information derived during exploration.

10. Weather interruptions in the Province of British Columbia may affect and delay the proposed exploration operations.

The proposed exploration work on the Standard claim should be performed during the late spring, summer and early fall due to weather conditions. It is normal in the Bralorne area for the late fall, winter and early spring months to be subject to heavy snow conditions. Even during the early summer months British Columbia is noted for its rainfall and during the middle to late summer months for its forestry closures due to hot dry weather. Standard cannot control the weather and if it plans a work program it might have to delay it due to unexpected weather conditions.

11. Standard is small company without much capital which might limit its exploration activities and ability to expand in the future.

The small size of Standard and lack of capital might mean a limited exploration program and a lack of ability to take advantage of business opportunities available to large companies. Having adequate capital would mean Standard's management could direct greater interest to the exploration of the Standard claim in hopes of obtaining information which will assist in its future development. Without adequate capital it will take longer to explore the Standard claim and limit Standard's ability to expand in the future.

12. Standard is a one property company

With only the Standard claim, Standard does not have the diversion in mineral properties which management would like. In addition, future investors might be wary to invest in a one property company since should the Standard claim prove to be without commercially viable mineralization, the investor might lose his or her entire investment.

-13-

13. Investment in Standard's common shares

An investment in the common shares of Standard is a speculative venture and an investor must realize that the shares are considered to be a high risk investment. An investor who cannot afford to lose their entire investment in Standard's shares should not consider an investment in Standard. The purchase of shares in Standard is not for widows and orphans.

14. Standard will have difficulty attracting mining personnel

Being a small company with only one mineral property might prove difficult for Standard to attract mining personnel to work on the Standard claim. Many consultants and workers want to be associated with companies who have financial

stability and a variety of mineral properties since this will give them the opportunity to move between properties in the event one property does not prove to have viable mineralization associated with it. With only the Standard claim, Standard will have to let workers go after the exploration season which usually are at times when the weather conditions are not suitable for them to find other properties to work on.

15. Standard may never be able to refining its ore reserve

Even though there exists a commercial viable ore body, there is no guarantee competition in refining the ore will not exist. Other companies may have long term contracts with refining companies thereby inhibiting the Company's ability to process its ore and eventually market it. At this point in time the Company does not have any contractual agreements to refine any potential ore it might discover on its mineral claim.

The foregoing plan of operations contains forward-looking statements that are subject to the risks and uncertainties, which could cause actual results to differ materially from those discussed in the forward-looking statements and from historical results of operations.

PART 11 - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

There are no legal proceedings to which Standard is a party or to which its mineral claim is subject, nor to the best of management's knowledge are any material legal proceedings contemplated.

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There has been, since inception, no meeting of securities holders.

ITEM 5. OTHER INFORMATION

CERTIFICATIONS

I, E. Del Thachuk, certify that:

1. I have reviewed this quarterly report on Form 10-QSB of Standard Capital Corporation ("Standard");
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of Standard as of, and for, the periods presented in this quarterly report;
4. Standard's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for Standard and have :
 - (a) Designed such disclosure controls and procedures to ensure that material information relating to Standard is made known to us by others within it, particularly during the period in which this quarterly report is being prepared;
 - (b) Evaluated the effectiveness of Standard's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation date"); and
 - (c) Presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation date;
5. Standard's other certifying officer and I have disclosed, based on our most recent evaluation, to Standard's auditors and Standard's board of directors:
 - (a) All significant deficiencies in the design or operation of internal controls which could adversely affect Standard's ability to record, process, summarize and report financial data and have identified for Standard's auditors any material weaknesses in internal controls, and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in Standard's internal controls; and
6. Standard's other certifying officer and I have indicated in this quarterly report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation including any corrective actions with regard to significant deficiencies and material weaknesses.

Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of Standard as of, and for, the periods presented in this quarterly report;
4. Standard's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for Standard and have :
 - (a) Designed such disclosure controls and procedures to ensure that material information relating to Standard is made known to us by others within it, particularly during the period in which this quarterly report is being prepared;
 - (b) Evaluated the effectiveness of Standard's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation date"); and
 - (c) Presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation date;
5. Standard's other certifying officer and I have disclosed, based on our most recent evaluation, to Standard's auditors and Standard's board of directors:
 - (a) All significant deficiencies in the design or operation of internal controls which could adversely affect Standard's ability to record, process, summarize and report financial data and have identified for Standard's auditors any material weaknesses in internal controls, and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in Standard's internal controls; and
6. Standard's other certifying officer and I have indicated in this quarterly report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation including any corrective actions with regard to significant deficiencies and material weaknesses.

PRESIDENT'S CERTIFICATION

CERTIFICATE PURSUANT TO
18 U.S.C. SECTION 1350
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report (the "Report") on the Form 10-QSB of Standard Capital Corporation (the "Company") for the six months ended February 28, 2003, as filed with the Securities and Exchange Commission on the date hereof, I, E. Del Thachuk, President and Director, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of my knowledge and belief:

1. The Quarterly Report fully complies with the requirements of Section 13 (a) or 15 (d) of the Securities and Exchange Act of 1934, as amended; and
2. The information contained in this Quarterly Report fairly presents, in all material respects, the financial condition and results of operation of the Company.
